

**B.Sc. IN MEDICAL LABORATORY TECHNOLOGY
(BSCMLT)**

Term-End Examination

December, 2015

BAHI-005 : CLINICAL BIOCHEMISTRY

Time : 3 hours

Maximum Marks : 70

Note : Attempt all questions.

1. Fill in the blanks : 1x10=10

- (a) _____ is a reducing monosacchride.
- (b) _____ is tumor marker for prostate cancer.
- (c) Full form of HDL is _____.
- (d) S.G.O.T. level is increased in _____.
- (e) True glucose is estimated by _____ method.
- (f) The end product of the breakdown of purine nucleic acid is _____.
- (g) Direct bilirubin is elevated in _____ Jaundice.
- (h) The lipids are transported in blood as _____.
- (i) Fundamental units of proteins are _____.
- (j) End product of aerobic glycolysis is _____.

2. (a) What are carbohydrates and how are they classified ? 4
- (b) Explain the procedure of GTT. 6
3. (a) Differentiate between DNA and RNA. 4
- (b) Describe the process of uric acid formation in the body. 6
4. (a) What are enzymes ? Name four enzymes. 4
- (b) Explain the factors influencing enzyme activity. 6
5. (a) Describe the metabolism of bilirubin in the body. 6
- (b) Write the characteristics of Direct and Indirect bilirubin. 4
6. (a) What is cholesterol ? 2
- (b) Enlist the functions of cholesterol. 5
- (c) Give sample value of serum cholesterol in the following conditions : 3
- (i) Myocardial infarction
- (ii) Hyperthyroidism
- (iii) Nephrotic syndrome

7. Write short notes on **any two** of the following.
Each carries **5** marks. **5x2=10**
- (a) Goat
 - (b) GTT in diabetic patients
 - (c) Lipoproteins
 - (d) Glycolysis
 - (e) Importance of copper and magnesium in human body.
